

J2V2 Consulting Ltd

Company Capability Profile

About Us

J2V2 Consulting is a specialist technology consultancy delivering enterprise-scale database, data platform, cloud, automation, and transformation solutions.

Founded by senior technology professionals with more than 40 years of combined experience, J2V2 provides practical hands-on expertise across Financial Services, E-Gaming, Manufacturing, Energy, Telecommunications, and Blockchain sectors.

We help organisations modernise technology, optimise operational performance, improve reliability, and build scalable platforms capable of supporting future growth.

Executive Summary

40+ Years Combined Experience

Enterprise Scale Delivery

Data, Cloud & Blockchain Specialists

Proven Delivery Across Multiple Industries

Our experience spans:

- Global SQL Server estates
 - Enterprise Data Warehouses
 - SAP and Oracle programmes
 - Cloud migration initiatives
 - Business transformation programmes
 - Solana infrastructure platforms
 - ClickHouse analytics environments
 - DevOps and automation frameworks
-

Leadership Team

Jerrica van Vuuren

Founder | Principal Data & Database Consultant

Enterprise data and database specialist with extensive experience across SQL Server, ClickHouse, PostgreSQL, Oracle, ETL frameworks, reporting platforms, automation, and blockchain analytics.

Key areas of expertise include:

- Database architecture
- Data platform design
- High availability solutions
- Performance optimisation
- Data warehousing
- Business intelligence
- ClickHouse infrastructure
- Solana analytics platforms
- DevOps automation

Career highlights include:

- Administration of global SQL Server estates exceeding 300 servers
- Delivery of enterprise reporting and analytics platforms
- Design and operation of large-scale ETL environments
- Business continuity and disaster recovery implementation
- Enterprise database migration and modernisation projects
- High-volume transaction processing environments

Senior programme and delivery executive with extensive experience leading large-scale transformation initiatives across Africa and internationally.

Key areas of expertise include:

- Programme management
- Transformation delivery
- ERP implementation

- Data migration
- Cloud transformation
- Business analysis
- Governance and compliance
- Operational excellence

Career highlights include:

- Delivery leadership across multiple African countries
 - Enterprise SAP migration programmes
 - Oracle ERP implementation programmes
 - Infrastructure transition and transformation initiatives
 - Managed services and operational delivery leadership
 - Large-scale technology modernisation projects
-

Industries We Support

Financial Services

- High availability platforms
- Transaction processing systems
- Regulatory compliance
- Data governance
- Operational reporting

E-Gaming & Betting

- High-volume transaction environments
- Real-time systems
- Reporting and analytics
- Platform performance optimisation
- Data warehousing

Energy, Oil & Gas

- Mission-critical systems
- Operational technology integration
- Production reporting
- Business continuity
- Enterprise data platforms

Manufacturing

- Systems integration
- Production planning
- ERP integration
- Process automation
- Operational analytics

Blockchain & Web3

- Solana infrastructure
 - Blockchain analytics
 - Distributed systems
 - ClickHouse platforms
 - High-volume data processing
-

Technology Expertise

Databases

- SQL Server
- ClickHouse
- PostgreSQL
- Oracle
- Cassandra

Data & Analytics

- Data Warehousing
- ETL Frameworks
- Power BI
- SSRS
- SSIS
- SAP Business Objects
- Reporting Platforms

Cloud & Infrastructure

- Microsoft Azure
- Linux
- Kubernetes
- Azure Data Factory

- Databricks

Monitoring & Observability

- Grafana
- Prometheus
- Custom Monitoring Platforms

Blockchain

- Solana
- ClickHouse Analytics
- Hydrant
- Blockchain Data Engineering

Automation & DevOps

- CI/CD
 - Infrastructure Automation
 - Platform Engineering
 - Release Automation
-

Representative Project Experience

Enterprise Data Warehouse Modernisation

Designed and implemented centralised reporting and analytics solutions integrating multiple source systems into a unified enterprise data platform.

Global SQL Server Estate Management

Managed and optimised large-scale SQL Server environments across multiple geographic locations, delivering high availability, performance optimisation, disaster recovery, and governance.

Oil & Gas Operational Technology Integration

Led integration and reporting initiatives connecting operational technology systems with enterprise reporting and analytics platforms.

SAP Data Warehouse Migration

Supported enterprise-scale migration initiatives involving SAP reporting environments, cloud-based analytics platforms, and modern data architectures.

Oracle ERP Transformation Programme

Delivered large-scale ERP transformation initiatives including data migration, business process redesign, testing, deployment, and operational readiness.

Solana Analytics Platform

Designed and operated blockchain analytics platforms leveraging ClickHouse infrastructure, large-scale data ingestion, monitoring, and performance optimisation.

DevOps & Automation Frameworks

Implemented monitoring, deployment, automation, and operational frameworks to improve platform reliability and reduce operational overhead.

Why J2V2

- 40+ Years Combined Experience
 - Enterprise-Scale Delivery
 - Practical Hands-On Consultants
 - Cross-Industry Expertise
 - Database, Data Platform & Blockchain Specialists
 - Programme Delivery & Transformation Leadership
 - Proven Success in Complex Environments
 - Focused on Outcomes, Reliability and Scale
